

Manage Your Largest Asset with Ease

The Essential App to Maintain Your Inventory

Revel's Inventory App is designed to make scanning and measuring physical inventory counts exponentially easier than ever before. With so much of your business investment tied into inventory costs, ensuring accuracy—without sacrificing efficiency—helps you better manage your primary asset.

Divide Your Store Into Sections for Accuracy

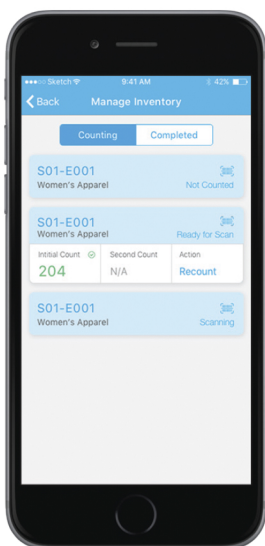

Manage the entire inventory process with ease by breaking your establishment into sections. Quickly identify and correct count errors within sections rather than recounting your store.

Reduce Time Spent Taking Physical Counts

Save valuable labor and financial resources with time-saving enhancements that make taking and recording inventory counts easier and more accurate the first time around.

Control How Inventory is Recorded

Determine the most effective strategy for inventory counts with a variety of user settings that help you ensure the most accurate accounting of current levels across your entire inventory.

“Whether I’m transferring a product, receiving inventory, or damaging something out, Inventory Management is really quick and efficient for me. I love the number of actions I can easily access to manage my inventory.”

- Cary Kelly, Owner, The Cookery

With Revel's Inventory App, merchants are able to save on their two biggest costs, labor and inventory, with a single solution. Take the headache out of tracking your most valuable asset by maximizing your efficiency.
