

## Increase Service Speed and Cut Long Lines

### Engage Customers with Self-Service Kiosks

Give your business the competitive edge with Revel's stand alone, self-service Kiosk POS. Enable customers to self-checkout or place their own orders on Revel's intuitive Kiosk interface, and speed through rushes without breaking a sweat or sacrificing the customer experience. With orders sent directly to the kitchen for production, you're bound to delight customers with prompt service.

#### Maximize the Value of Your Workforce

Enhance your operations by leveraging more employees to carry out high-value tasks like production and reduce your order taking staff without slowing down the line.

#### Keep Your Customers Coming Back

Integrate your CRM and loyalty programs seamlessly into your kiosk so customers can earn rewards, quickly view their order history, and easily reorder their favorites.

#### Grab More Customers with Grab and Go

Introduce a new stream of revenue and cut down on wait times by adding a grab and go selection of items in your restaurant for customers who are short on time.

“ We went with the self service kiosk so people can order for themselves. Its advantageous in that orders go straight to the kitchen. 20% of our sales are through the self serve station. ”

- Catherine Heaney, Owner, CHAR Burger

Revel's self-service Kiosk helps your business focus on today's changing requirements of the customer experience, helping you continuously maximize the lifetime value of customers and employees alike.
